Author index

Aizenshtat, Z., see Cohen, Y., 153
Albrechtsen, R.S., see Valcarce, R.V., 1
Atalla, A.A., see Kamal El-Dean, A.M., 107
Atay, T., see Bicak, N., 197

Bahattin Soydan, A., see Bicak, N., 197
Beal, E.J., see Mushrush, G.W., 73
Beringer, J.E., see Goodacre, R., 19
Berkeley, R.C.W., see Goodacre, R., 19
Bicak, N.
—, Koza, G., Bahattin Soydan, A. and Atay, T.
Pyrolysis of alkoxy ethyl borates, 197
Boon, J.J., see Faix, O., 239
Bremer, J., see Faix, O., 239
Buryan, P.
Thermal decomposition of dimethylphenols, 83

Chortyk, O.T., see Schlotzhauer, W.S., 231
Cohen, Y.
—, and Aizenshtat, Z.
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153

Deglise, X., see Donnot, A., 39
Deglise, X., see Donnot, A., 47
Donnot, A.
—, Magne, P. and Deglise, X.
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 46
Donnot, A.
—, Magne, P. and Deglise, X.
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47

Esser, W.
—, and Schwochau, K.
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61

Faix, O.
—, Bremer, J., Meier, D. and Fortmann, I., Scheijen, M.A. and Boon, J.J.
Characterization of tobacco lignin by analytical pyrolysis and Fourier transform-infrared spectroscopy, 239
Fortmann, I., see Faix, O., 239
Fujimura, Y., see Hida, M., 179

Gaber, A.M., see Kamal El-Dean, A.M., 107
Goodacre, R.
—, Berkeley, R.C.W. and Beringer, J.E.
The use of pyrolysis–mass spectrometry to detect the fimbrial adhesive antigen F41 from *Escherichia coli* HB101 (pSLM204), 19

Hida, M.
—, and Mitsui, T., Minami, Y. and Fujimura, Y.
Effect of added inorganic salts to a pyrolysis foil on pyrolysis of benzylamine by Curie-point pyrolysis–gas chromatography, 179
Hiltz, J.A.
Pyrolysis–gas chromatography/mass spectrometry identification of styrene cross-linked polyester and vinyl ester resins, 113
Huang, F.
—, Wang, X. and Li, S.
The thermal stability of aliphatic polyesters and polyester–alkali metal salt complexes, 139

Kajioka, R.
—, and Noble, M.A.
The analysis of *Listeria monocytogenes* by pyrolysis–mass spectrometry, 29
Kamal El-Dean, A.M.
—, Atalla, A.A. and Gaber, A.M.
Molecular rearrangements of sulphur compounds. Part 3. Pyrolysis of substituted thiazolidinones, 107
Koza, G., see Biçak, N., 197

Li, S., see Huang, F., 139

Magne, P., see Donnot, A., 39
Magne, P., see Donnot, A., 47
Mazerolles, P.
—, Reynes, A., Sefiani, S. and Morancho, R.
Synthesis and pyrolysis or organometallic precursors of Si–C–Ge alloy amorphous thin films, 95
McClelland, D.B., see Mushrush, G.W., 73
Meier, D., see Faix, O., 239
Minami, Y., see Hida, M., 179
Mirmiran, S.
Characterization of used tire vacuum pyrolysis oil:
nitrogenous compounds from the naphtha fraction, 205
Mitsui, T., see Hida, M., 179
Morancho, R., see Mazerolles, P., 95
Mose, D.G., see Mushrush, G.W., 73

Mushrush, G.W.
—, and Beal, E.J., Mose, D.G. and McClelland, D.B.
The pyrolysis reactions and jet fuel potential of a Green River shale oil, 73

Noble, M.A., see Kajioka, R., 29

Ponder, G.R.
—, Richards, G.N. and Stevenson, T.T.
Influence of linkage position and orientation in pyrolysis of polysaccharides: a study of several glucans, 127

Reynes, A., See Mazerolles, P., 95
Richards, G.N., see Ponder, G.R., 127

Sağlam, M., see Tutas, M., 129
Scheijen, M.A., see Faix, O., 239
Schlotzhauer, W.S.
—, Snook, M.E., Chortyk, O.T. and Wilson, R.L.
Pyrolytic evaluation of low chlorogenic acid tobaccos in the formation of the tobacco smoke co-carcinogen catechol, 231
Schwochau, K., see Esser, W., 61
Sefiani, S., see Mazerolles, P., 95
Smith, G.G., see Valcarce, R.V., 1
Snook, M.E., see Schlotzhauer, W.S., 231
Stevenson, T.T., see Ponder, G.R., 127
Subba Rao, M., see Sujatha Devi, P. 187
Sujatha Devi, P.
—, and Subba Rao, M.
Study of the thermal decomposition of lanthanum and chromium citrate hydrates, 187

Tutaş, M.
—, Sağlam, M. and Yüksel, M.
Investigation of pyrolysis products of polyacrylamide by pyrolysis–gas chromatography, 129

Valcarce, R.V.
—, Smith, G.G. and Albrechtsen, R.S.
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1

Wang, X., see Huang, F., 139
Wilson, R.L., see Schlotzhauer, W.S., 231

Yüksel, M., see Tutaş, M., 129

Journal of Analytical and Applied Pyrolysis, 22 (1992) 265–268
Elsevier Science Publishers B.V., Amsterdam

Subject index

Acrylamide
Investigation of pyrolysis products of polyacrylamide by pyrolysis–gas chromatography, 129
Alkoxy ethyl borates
Pyrolysis of alkoxy ethyl borates, 197
Amorphous thin layers
Synthesis and pyrolysis of organometallic precursors of Si–C–Ge alloy amorphous thin films, 95
Antigen
The use of pyrolysis–mass spectrometry to detect the fimbrial adhesive antigen F41 from *Escherichia coli* HB101 (pSLM204), 19
2-Arylimino-3-arylthiazolidin-4-one
Molecular rearrangements of sulphur compounds. Part 3. Pyrolysis of substituted thiazolidinones, 107
Atomic emission
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205

Benzylamine
Effect of added inorganic salts to a pyrolysis foil on pyrolysis of benzylamine by Curie-point pyrolysis–gas chromatography, 179
Boron esters
Pyrolysis of alkoxy ethyl borates, 197

Caffeoylquinic acids
Pyrolytic evaluation of low chlorogenic acid tobaccos in the formation of the tobacco smoke co-carcinogen catechol, 231
Catalyst lifetime
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 39
Catalysts
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47
Catechol
Pyrolytic evaluation of low chlorogenic acid tobaccos in the formation of the tobacco smoke co-carcinogen catechol, 231
Chemical mechanism
Influence of linkage position and orientation in pyrolysis of polysaccharides: a study of several glucans, 217
Chemometrics
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1
Chromium citrate
Study of the thermal decomposition of lanthanum and chromium citrate hydrates, 187
Combined gas chromatography–mass spectrometry
The thermal stability of aliphatic polyesters and polyester–alkali metal salt complexes, 139
Condensed pyro-products
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153
Cracking reaction
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 39

Degradation mechanism
The thermal stability of aliphatic polyesters and polyester–alkali metal salt complexes, 139
Dimethylphenols
Thermal decomposition of dimethylphenols, 83
Dioxane
Pyrolysis of alkoxy ethyl borates, 197
Dolomite
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47

E. coli HB101
The use of pyrolysis-mass spectrometry to detect the fimbrial adhesive antigen F41 from *Escherichia coli* HB101 (pSLM204), 19
Enterotoxin
The use of pyrolysis–mass spectrometry to detect the fimbrial adhesive antigen F41 from *Escherichia coli* HB101 (pSLM204), 19

Evolution profiles
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61

Fibers
Investigation of pyrolysis products of polyacrylamide by pyrolysis–gas chromatography, 129
Fimbrial
The use of pyrolysis-mass spectrometry to detect the fimbrial adhesive antigen F41 from *Escherichia coli* HB101 (pSLM204), 19
Food
The analysis of Listeria monocytogenes by pyrolysis–mass spectrometry, 29

Gas chromatograph
The pyrolysis reactions and jet fuel potential of a Green River shale oil, 73
Gas chromatography
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205
Effect of added inorganic salts to a pyrolysis foil on pyrolysis of benzylamine by Curie-point pyrolysis–gas chromatography, 179
Investigation of pyrolysis products of polyacrylamide by pyrolysis–gas chromatography, 129
Pyrolysis–gas chromatography/mass spectrometry identification of styrene cross-linked polyester and vinyl ester resins, 113
Thermal decomposition of dimethylphenols, 83
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1
Germanium
Synthesis and pyrolysis of organometallic precursors of Si–C–Ge alloy amorphous thin films, 95

Highly branched structure
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153

Infrared spectroscopy
Study of the thermal decomposition of lanthanum and chromium citrate hydrates, 187
Inorganic salt
Effect of added inorganic salts to a pyrolysis foil on pyrolysis of benzylamine by Curie-point pyrolysis–gas chromatography, 179

Jet fuel
The pyrolysis reactions and jet fuel potential of a Green River shale oil, 73

Kinetic parameters
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61
Kinetic profile
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153

Lanthanum citrate
Study of the thermal decomposition of lanthanum and chromium citrate hydrates, 187
Lignin
Characterization of tobacco lignin by analytical pyrolysis and Fourier transform–infrared spectroscopy, 239
Listeria monocytogenes
The analysis of *Listeria monocytogenes* by pyrolysis–mass spectrometry, 29
Long-chain structure
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153

Mass spectrometry
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205
Pyrolysis–gas chromatography/mass spectrometry identification of styrene cross-linked polyester and vinyl ester resins, 113
Synthesis and pyrolysis of organometallic precursors of Si–C–Ge alloy amorphous thin films, 95
The analysis of *Listeria monocytogenes* by pyrolysis–mass spectrometry, 29
Maturity
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61
Middle distillate fuels
The pyrolysis reactions and jet fuel potential of a Green River shale oil, 73
Milled wood lignins
Characterization of tobacco lignin by analytical pyrolysis and Fourier transform-infrared spectroscopy, 239
Mono-alkyl glycoles
Pyrolysis of alkoxy ethyl borates, 197

Multivariate analysis
Effect of added inorganic salts to a pyrolysis foil on pyrolysis of benzylamine by Curie-point pyrolysis–gas chromatography, 179

Nitrogenous compounds
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205
Nonisothermal pyrolysis
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61

Organometallic derivatives
Synthesis and pyrolysis of organometallic precursors of Si–C–Ge alloy amorphous thin films, 95

Pattern recognition
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1
Phenol–formaldehyde resins (PFRs)
Investigation of pyrolytically produced condensates of phenol–formaldehyde resins, in relation to their structure and decomposition mechanism, 153
Phenols
Thermal decomposition of dimethylphenols, 83
Poisoning
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 39
Polyacrylamide
Investigation of pyrolysis products of polyacrylamide by pyrolysis–gas chromatography, 129
Polyester
The thermal stability of aliphatic polyesters and polyester-alkali metal salt complexes, 139
Polysaccharides
Influence of linkage position and orientation in pyrolysis of polysaccharides: a study of several glucans, 217
Pyrolysis oil
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205

Resins
Pyrolysis–gas chromatography/mass spectrometry identification of styrene cross-linked polyester and vinyl ester resins, 113

Rubber
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205

Salt catalysis
Influence of linkage position and orientation in pyrolysis of polysaccharides: a study of several glucans, 217
Shale oil
The pyrolysis reactions and jet fuel potential of a Green River shale oil, 73
Silicon
Synthesis and pyrolysis of organometallic precursors of Si–C–Ge alloy amorphous thin films, 95
Solid polymeric electrolyte
The thermal stability of aliphatic polyesters and polyester–alkali metal salt complexes, 139
Styrene
Pyrolysis–gas chromatography/mass spectrometry identification of styrene cross-linked polyester and vinyl ester resins, 113
Sulphur compounds
Molecular rearrangements of sulphur compounds. Part 3. Pyrolysis of substituted thiazolidinones, 107

Tar
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 39
Thermal decomposition
Study of the thermal decomposition of lanthanum and chromium citrate hydrates, 187
The thermal stability of aliphatic polyesters and polyester–alkali metal salt complexes, 139
Thiazolidinones
Molecular rearrangements of sulphur compounds. Part 3. Pyrolysis of substituted thiazolidinones, 107
Tires
Characterization of used tire vacuum pyrolysis oil: nitrogenous compounds from the naphtha fraction, 205
Toarcian oil shales
Evolution of individual hydrocarbons (C1–C4) by nonisothermal pyrolysis of petroleum source rocks, 61

Tobacco
Characterization of tobacco lignin by analytical pyrolysis and Fourier transform-infrared spectroscopy, 239
Tobacco leaf
Pyrolytic evaluation of low chlorogenic acid tobaccos in the formation of the tobacco smoke co-carcinogen catechol, 231
Tobacco smoke
Pyrolytic evaluation of low chlorogenic acid tobaccos in the formation of the tobacco smoke co-carcinogen catechol, 231

Wheat cultivars
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1
Winter wheat
Winter wheat cultivar differentiation by Curie point pyrolysis–gas chromatography–pattern recognition of whole seeds: a feasibility study, 1
Wood
Kinetic parameters of the cracking reaction of tar from wood pyrolysis; comparison of dolomite with industrial catalysts, 47
Method of determining catalyst lifetime in the cracking reaction of tar from wood pyrolysis, 39
